EXPERIENCE

FlushPoint | (Capstone Project) | Full Stack Developer | Link: flushpointph.com

Built location-based platform for accessible comfort rooms, integrating responsive front-end (CSS, JS) and robust PHP/MYSQL backend to enhance user accessibility

KST Merchandising | (OJT) | Full Stack Developer | Link: kstmerchandising.vercel.app

a web-based ordering and management system designed to streamline the sales and operations of a shawarma business. The system allows customers to conveniently browse the menu, customize their orders, and place purchases online in a fast and user-friendly platform.

Personal Portfolio Website | Link: <https://archie-coral.vercel.app/>

A responsive web-based portfolio designed to showcase my technical skills, development projects, and professional experience. The platform provides visitors with an overview of my expertise in web development, featured projects, technologies used, and contact information through a clean and user-friendly interface.

Freelance Designer

Analyzed client needs and objectives to propose customised design strategies. Consult with the clients to understand project limitations and constraints.
